SKILLS

- Web development with JavaScript, ReactJs, Docker, SQL, Express
- ReactJs with TypeScript. and Mobile app development with React Native

EDUCATION

- Bachelor's degree in Computer Science at Wellspring University Graduated in 2025

SPOKEN LANGAGES

I. English

PROFESSIONAL AND PERSONAL EXPERIENCE

FrontEnd Developer, Blueportal company Blueportal | from February 2024 to November 2024

Link: [ghhttps://blueportalcompany.com/](https://blueportalcompany.com/)

I worked at blueportal as a frontend developer during my SIWES. I worked on a record label web app for the company and also an event application for the company where people can book event and watch event virtually, I worked on both the frontend and backend. On this project I am responsible of these tasks :

- Defining and designing the architecture of the platform as well as defining the direction of the project and the features to implement
- Implementing the backend and API of the project, using express for the backend project and React on the frontend
- Worked on them as a solo developer and still delivering before deadlines
- The project was made using express and NextJS , I adhered to good software principles by writing integrated tests and using github actions to deploy to render

Tech Stack : Express, PostGres, NextJS, React

Frontend Developer, Internship and Apprenticeship LXARIS SYSTEMS | from August 2021 to September 2023

- As a Frontend Developer at lxaris, I had to work on several projects such as :
- Migrating lxaris from CRA (create react app) to next JS, and later deploying it on a VPS
- I was also made in charge to create a monorepo where we put all of our frontend websites and apps
- Integrated serverless postgres database into the company architecture, crafting queries that enabled seamless data retrieval and manipulation become 10* easier.
- Introduced caching to the company architecture to limit calls made to the database and limit cloud bills.

Tech Stack :NextJS, React JS, Github CI and Google Cloud Platform
